Education

UNIVERSITY OF PENNSYLVANIA – EXPECTED GRADUATION MAY 2021

B.S.E. in Computer Science from the School of Engineering and Applied Science.

Minors in Data Science and Mathematics from the School of Engineering and Applied Science.

Coursework: Scalable and Cloud Comp., Data Structures and Algorithms, Market and Social Systems on the Internet, Discrete Math, Digital Design, Negotiations, Corporate Finance

Employment

SOFTWARE ENGINEERING INTERN | UNISYS

JUNE 2018 – AUGUST 2018

Designed and built a DevOps application to optimize I/O operations by allowing engineers to easily read in the properties of a selected disk or system of disks, a task previously accomplished through a hex editor. Created in Visual Studio through .NET's Windows Presentation Foundation (WPF), C# backend. Development in Agile Scrum with Jira.

Modified an existing hex editor tool to allow modification of non-Unisys formatted disks in a readable format.

RESEARCH ASSISTANT | PENN INSTITUTE FOR BIOMEDICAL INFORMATICS

SEPTEMBER 2017 – APRIL 2018

Compiled a model of re-admittance rates for patients of various cancers and illnesses by analyzing selected hospital data sets for key characteristics (age, weight, delay between visits, etc.) through the PennAI software. Supported by AWS.

RESEARCH INTERN | CHINESE ACADEMY OF SCIENCES

JUNE 2016 – AUGUST 2016

Illustrated how the Zika Virus affects the development of brain cells in newborn mice using imaging software on protein-stained brain segments, measured protein expression of affected brain cells using Western Blot analysis.

Predicted financial impact of virus on the healthcare system of Southeast Asia, an area with limited infrastructure.

Leadership Experience

PENN INTERNATIONAL AFFAIRS ASSOCIATION (IAA) Director of Operations, in charge of planning conference logistics and coordinating website maintenance and marketing. Emphasized intuitive design in rebuilding the website Fall of 2018.

RESEARCH, INNOVATION, ENTREPRENEURSHIP PROGRAM (RIE) Programming and outreach committee leader responsible for speaker series and engagement, doubled freshmen participation Spring of 2017.

Side Projects

SEARCHLT (JAVASCRIPT) Google Chrome extension built as an alternative to the native page search, passively displays all other occurrences of the user's highlighted term or phrase across the page, as well as key search terms if the user lands on the page through a search engine.

ECHO (REACT NATIVE) A lifestyle mobile application for IOS that uses voice-recognition to create personalized alarms based on self-recorded audio messages.

SIDEWINDER (JAVA) A multiplayer twist to the classic game of snake that allows players to compete against each other for powerups and points in the same arena.

BREATHALOCKER (ARDUINO) Arduino-based bike lock that only opens for users that can pass a breathalyzer test as a further precaution against inhibited riding.

Skills and Achievements

TECHNICAL SKILLS

Programming languages:	C#, Java, JavaScript, Python, OCaml, XAML, MatLab
Frameworks and Environments:	Visual Studio, Jira, WPF (.NET), AWS, React Native, React.js, Node.js, Bootstrap, AngularJS, JQuery, Unix, Git, Docker
Modeling software:	Adobe Photoshop, Adobe Illustrator, Adobe InDesign, SolidWorks/CAD
Languages:	Fluent in spoken and written Chinese (Mandarin)

ACHIEVEMENTS

(2013) Became the youngest scout in PA district 9 to earn the rank of Eagle Scout

(2015) SAT: 2400, SAT Math II: 800, SAT Chem: 800

PERSONAL INTERESTS

Human-Computer Interaction, App Development, Machine Learning, Product Design, Graphic Design, Philadelphia Eagles
